

# Laboratory Waste Services

## Sustainable Laboratory Waste Services

As the UK's leading laboratory waste specialists, we offer integrated waste management packages for all your waste, including on-site chemist services, flexible collections and environmentally sustainable waste treatment, recycling and disposal.

### On-site Chemist Service

Offering a nationwide service, we provide on-site fully trained and experienced chemists for the identification, sampling, classification, packaging/re-packaging and labelling of your waste to ensure compliance with current transport regulations. We can assist you with completing an inventory and all other documentation required for the legal and safe transportation of your laboratory waste.

### Nationwide Collections

Tradebe Labwaste operate a substantial fleet of small/medium sized vans and lorries that can accept a broad range of laboratory waste types. We have established dense customer routes that routinely collect hazardous, chemical wastes and recyclables from companies across the country. We provide flexible routine and one-off collections.

### Sustainable Waste Transfer, Treatment, Recycling & Disposal

Your laboratory waste will be inspected, sorted and segregated at one of our nationwide transfer stations, prior to recycling, treatment and/or final disposal. Our in-house facilities include chemical recycling, fuel blending, aqueous treatment, such as neutralisation and secure high temperature incineration. Sustainability is at the heart of Tradebe's operations, so we provide the most environmentally sound and economical solution when treating your laboratory waste.

Chemical Recycling, Tyne & Wear

Solvent Fuel Blending, Lancashire

High Temperature Incineration, Hampshire

# Laboratory Services Overview

## Laboratory Services Overview

Tradebe Labwaste are the UK's leading specialists in the management of laboratory waste. In addition, we provide a wealth of other laboratory services including:

**Chemical Packing/Movements** - Our experienced and trained specialist chemists provide sampling, identification, packing/re-packing, labelling, inventory completion and any other paperwork required for the safe and legal transportation of your chemicals or hazardous substances.

**Chemical Storage** - We have a wide range of on and off-site permanent and temporary storage solutions to hire or purchase for your chemical storage requirements.

**Waste Transfer, Treatment, Recycling & Disposal** - Sustainability is at the heart of Tradebe's operations. We provide the most environmentally sound and economic solution when treating your waste. Waste is inspected, sorted and segregated at one of our nationwide transfer stations, prior to recycling, treatment and/or final disposal. Our in-house facilities include chemical recycling, fuel blending, neutralisation and high temperature incineration.

**Decontamination, Decommissioning & Relocations** - We offer comprehensive laboratory decontamination, decommissioning and relocation services that are project managed to meet your specific requirements and budget.

**Disaster Recovery** - We provide emergency assistance after a laboratory disaster such as fire, flood, or spillage, including restoration and repair services to return your laboratory to a high standard.

**HazBox Service** - Our small mixed hazardous collection service is for wastes such as aerosols, adhesives, batteries, paint, oils, inks, resins, WEEE. Our compact HazBox offers a simple, cost effective, sustainable and legally compliant solution for a multitude of waste types.

**Radiation Monitors** - We provide an efficient and professional service for the repair, testing, and calibration of gamma dose rate and alpha/beta contamination monitors. Radiation monitoring equipment is also available for purchase or hire.
